# Data Strategy | Data Vision

To do more with strong focus to improve quality and leverage on data usage

Since **2019, Portugal has invested to build a new data foundation** and **started to spread acculturation**. 2021 will be more focused on :
- **Improving data quality** based on dedicated project organization teams and common transversal objectives
- Pursuing **value creation** through new Data Business uses cases
- **Decommissioning former IT** Data infrastructure while continuing to invest on **protection measures**

Increase Data Value Towards IA
A *

- Pursue to create valor increasing Data uses cases implementation
- Boost Data driven and decision making leveraging on "AI"
- Setup organization and skills adapted to future Data usage

Improve Data Quality
B *

- Industrialize RaDAR principles to continue to certify Data
- Define and share common Quality objectives
- Deploy transversal tools and governance

Enforce Data Culture
C

- ✓ Transversal Data Community to ensure Data strategy prioritization
- Pursue Acculturation, Training, communication
- Align Data roles and responsibilities

Build Foundation
D

- ✓ Implement common procedural framework
- ✓ Deploy 1st and 2nd line of deference and related controls plan
- Invest on new Data Management System and architecture
- Ensure sufficient Data Protection and Security measures

* **These 2 pillars will be leveraged in DW Decommissioning 4 steps.**

✓ Done   ■ On-going   ■ To start
